CAREER OBJECTIVE

Detail-oriented and results-driven Computer Science student with a strong foundation in Machine Learning and Full Stack Development. Passionate about engineering intelligent systems, optimizing application backend data pipelines, and implementing innovative software solutions. Seeking an internship opportunity to leverage software development capabilities, gain intensive industry experience, and contribute to impactful real-world projects.

TECHNICAL SKILLS

Programming Languages: Python, C, Java (Basics)
Machine Learning & AI: K-Means Clustering, OpenCV, Feature Extraction, LLM Testing, RAG
Web & Full Stack: REST APIs, Microservices, HTML, CSS, JavaScript, Flask, MongoDB Atlas, PostgreSQL, SQLAlchemy
Tools & Platforms: GitHub Actions, Docker, ServiceNow, n8n Automation, Groq/Gemini APIs, VS Code, Git, AWS (EC2)
Cloud & Big Data: Hadoop, Hive, HDFS, HBase, Virtualization

EXPERIENCE

TheContextLab.ai Apr 2026 – May 2026
Platform Testing Intern – Sapiency AI Platform Remote

- Installed and configured the Sapiency AI CLI, conducting end-to-end UX tests in an Agile workflow.
- Tested and validated core scenario paths for agentic learning layers, including the **REVA** module and the **ADA** module.
- Evaluated behavioral logic, runtime conversational frameworks, and in-session guidance for the Sapiency AI Advisor role.

PROJECTS

Genesis: AI Department Academic Intelligence System | *Flask, Groq/Gemini APIs, n8n, PostgreSQL* GitHub

- Won **1st Place at AGENTVERSE** for designing a role-based college ecosystem with multi-portal data routing and a real-time SQL-backed messaging matrix.
- Implemented a K-Means clustering pipeline to segment student cohorts and visualized performance with Chart.js radar graphs.
- Engineered a drag-and-drop analytics engine that parses bulk datasets via Groq/Gemini APIs and creates JSON alerts through n8n.

Autonomous AI Repair Agent (SWE-bench Task) | *Python, Claude API, GitHub Actions, SQL* GitHub

- Built a self-healing AI repair agent with Claude 3.5 Haiku, automating refactoring of OpenLibrary’s data import logic and eliminating manual intervention.
- Reduced backend latency by creating an internal SQL query layer (`find_staged_or_pending`) that cut redundant external API calls by 40%.
- Built a dynamic CI/CD testing and logging workflow using **GitHub Actions** to verify system state changes automatically, achieving an autonomous execution speed of 0.8 seconds while maintaining a 100% test pass rate (3/3).

PII Detector (SIH Project) | *Python, Flask, Roboflow API, OpenCV* GitHub

- Developed a Flask web application integrated with a custom object detection model trained on a curated dataset of over **1,000 image samples** to automatically isolate and mask sensitive identity parameters on Aadhaar and PAN cards.
- Engineered real-time image processing and redaction logic utilizing **OpenCV** to render precise pixel-level bounding boxes over targeted document data boundaries, ensuring localized data privacy and secure file downloading.

EDUCATION

Government College of Engineering, Erode 2023 – Present
B.E. in Computer Science and Engineering CGPA: 8.92 | No history of arrears

Sri Vijay Vidyalaya Matric Hr Sec School, Dharmapuri Passed 2023
Higher Secondary Course (12th Grade) Percentage: 92.67%

CERTIFICATIONS

ServiceNow Micro-Certifications: Welcome to ServiceNow, Flow Designer (Flows) (2026)
Introduction to Machine Learning – NPTEL (2026)
Cybersecurity – Google (Conducted by Ingage, 2024)
Crash Course on Python – Coursera (2025)
Anthropic Courses: Claude 101, ClaudeCode 101 (2026)

ACHIEVEMENTS & ACTIVITIES

- 1st Place Winner**, AGENTVERSE Departmental Hackathon – Awarded top position for project innovation and ecosystem architecture.
- College-Level Core Selection**, Smart India Hackathon (SIH) – Selected to represent the institution across two consecutive national hackathon cycles for high-impact prototype designs.
- Hackathon Competitor**, UIDAI National Hackathon & multiple premier inter-collegiate engineering hackathons.
- Active Cybersecurity CTF Participant**, competed in specialized Capture The Flag data security and vulnerability assessment drills.

SOFT SKILLS

Problem Solving, Teamwork, Quick Learner, Clear Technical Communication, Time Management.
